Intimate Skin Whitening **Male, Female** & **Everybody**

September 2024

Service Overview

Intimate skin whitening is a process designed to lighten hyperpigmented (darker) areas around the genitals and anus. This creates a more even skin tone that blends seamlessly across your body. While hyperpigmentation is completely normal and results from the pigment found in your skin, we can lighten these areas.

Areas That Can Be Treated

- Anus and Perianal Area
- Vaginal Area : Including mons pubis & labia majora
- Base of the Penis
- Inner Groin and Thighs
- Armpits
- Around the Nipples

Benefits of the “Pink Intimate System”

- **Pain-Free Treatment:** A comfortable experience with no discomfort.
- **Instant Brightness:** Boosts the radiance and brightness of your skin immediately.
- **Firming & Hydration:** Noticeable firming and deep hydration after the first treatment.
- **Non-Invasive Tightening:** Achieve tighter skin without surgery or downtime.
- **Quick Results:** Visible improvements after the very first session.
- **Cellular Renewal:** Stimulates skin’s natural turnover for long-lasting results.
- **No Downtime:** Return to your day immediately—no bruising, redness, or peeling.

The "PinkIntimate System" Can Address:

- **Hyperpigmentation:** Lightens darker areas for a more even complexion.
- **Uneven Skin Tone:** Restores a balanced and brighter look.
- **Skin Laxity:** Firms and tightens delicate areas.
- **Rough Skin Texture:** Smooths and softens for a rejuvenated feel.
- **Wrinkles & Fine Lines:** Reduces the appearance of aging signs for a youthful look.

Details

Treatment Duration and Appointments

A full course includes five to six treatments for optimal results. Each appointment lasts approximately 45 minutes, with visible changes from your first visit.

Pricing

- **Prepaid Package :** Six treatments for just £300.
- **Pay-Per-Visit :** £60 per appointment if you prefer to pay as you go.

Timing Between Appointments

Each session should be spaced between 7 and 14 days apart to ensure maximum effectiveness and safe results.

Who Might Not Be Suitable for Skin Whitening

- Pregnant or breastfeeding individuals
- Those undergoing chemotherapy or radiotherapy
- Anyone currently using IPL or laser hair removal in the treatment area
- Individuals with eczema, psoriasis, or dermatitis in the treatment area
- Those with active genital infections or skin conditions
- People with vitiligo or other immune conditions affecting the skin
- Those who have used Roaccutane or Tretinoin
